Crankshaft pulley

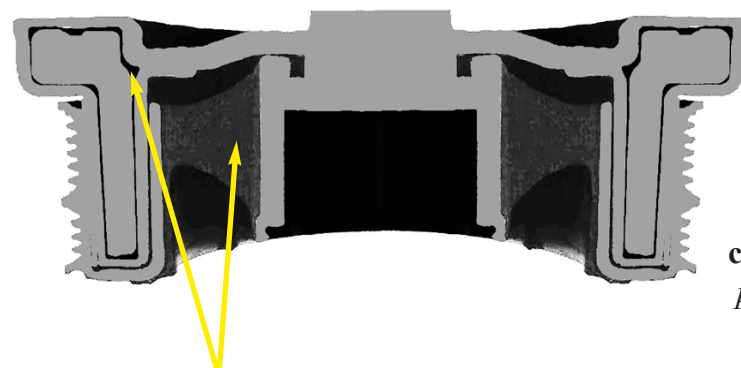

Trapezoidal profile belt

Données techniques

Technical informations

- La poulie de vilebrequin avec son système damper permet de réduire les à-coups occasionnés par les fortes accélérations notamment sur les moteurs HDi, DCi et essence Turbo compressés.
- Elle réduit les vibrations sur les éléments plus fragiles comme : l'alternateur, la pompe de direction assistée ainsi que d'autres éléments auxiliaires.
- A chaque remplacement du kit de distribution, de la courroie d'accessoires selon les préconisations données par le constructeur, il est obligatoire de procéder au contrôle de la poulie damper.
- Toute vibration constatée nécessite un contrôle.

- *The crankshaft pulley with its damper system allows to reduce hiccup brought by strong accelerations notably on HDi, DCi and turbo charged engine.*
- *The pulley reduces vibrations on more sensitive elements such as alternator, power steering pump and further auxiliary units.*
- *When replacing timing belt kit, or accessories belt following vehicle manufacturers recommendations, it is compulsory to control the damper pulley.*
- *Any re-felt vibration requires to be checked.*

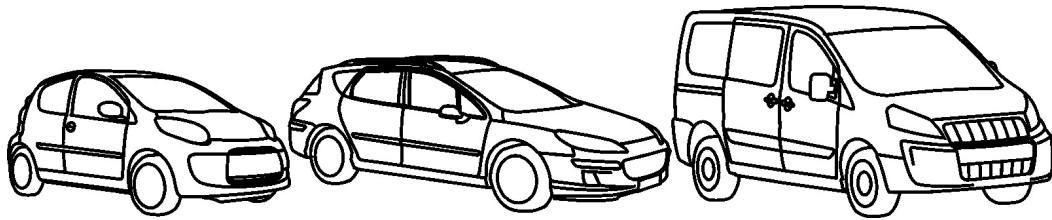

coupe d'une poulie
pulley drawing

partie caoutchouc absorbant les vibrations
rubber part absorbing vibration

L'adhésion de la pièce caoutchouc sur le support métal permet un amortissement optimal
Bonding of the rubber part on the metal part allows optimal vibration absorption
